

Sexually transmitted infections (STIs) centers, distributed in the 15 northern States

Services provided at these centers include the followings:

- Medical care for STIs patients ,
- history taking and clinical examination
- Correct diagnosis of the case , using a simple syndromic approach method without need for laboratory testing
- Prescription of the suitable antibiotic
- Education on STIs nature of the infection , mode of transmission and prevention & control methods
- Counseling on behavior change , risk reduction and condom use
- Partners management
- Follow up of the patients

Note:

- High quality counseling services are available
- There is a good opportunity for HIV counseling & testing in a confidential and voluntary way in STIs centers
- Provision of free of charge STIs drugs
- Sexual partners have the same chances as patients to use services
